Making better products in better ways.

- We select materials and processes that are more sustainable, and manufacturing that has less impact.
- Our products are designed to be more efficient, reducing energy use and carbon impact.
- We make products that are reliable, serviceable and built to last.

“We export our products to 86 countries across the world.”

● Numatic HQ - Somerset, UK ● Subsidiary Numatic Companies ● International Partners

“We continually review, refine and adapt our manufacturing processes to deliver even greater levels of sustainability throughout our product ranges.”

Chris Duncan
Chairman and Founder of Numatic International Ltd.

In 2025, our customers continue to face an array of complex and urgent challenges. Key priorities such as elevating cleaning and hygiene standards, optimising productivity and advancing sustainability remain at the forefront of our customers agendas. Addressing today's demands while preparing for the challenges of tomorrow requires professional cleaning solutions that deliver **Performance You Can Trust.**

Delivering excellence in customer service and product performance across the globe.

Subsidiary Numatic companies are based in France, Germany, South Africa, The Netherlands, Switzerland, Portugal, Spain and Italy. SUSTAINABILITY

Sustainability Formula

The Numatic Sustainability Formula is the foundation to all our product development and sustainable initiatives.

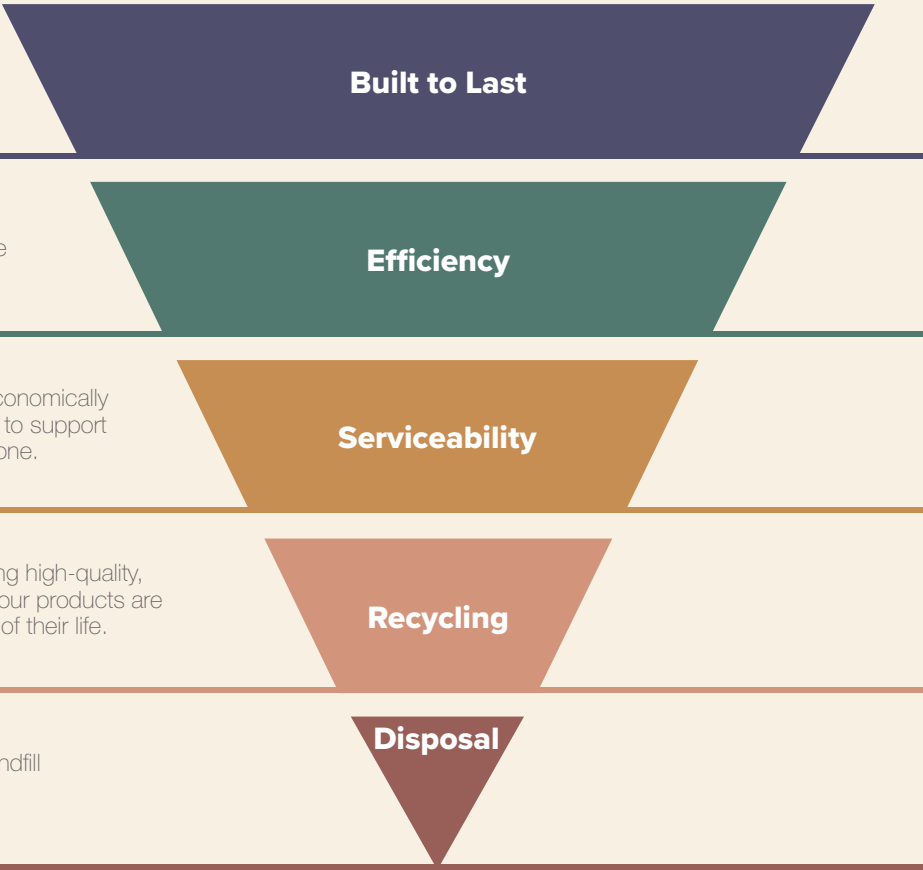

Our products are built to last with tried, tested and trusted designs, ongoing innovations and a commitment to developing sustainable cleaning solutions.

We ensure our products are the most efficient for every user; from water and detergent usage to electricity consumption.

Our products are designed to be easily and economically serviced throughout their lifecycle. We commit to support every product we have ever made, since day one.

We are committed to developing products using high-quality, recycled plastic. Right from their initial design, our products are manufactured to be easily recycled at the end of their life.

We work hard to ensure zero waste goes to landfill and have achieved this since 2017.

Integrated Sustainability

We recognise the need and demand for sustainable cleaning solutions and commit to initiatives across our business.

A sustainable approach is integrated throughout all of our operations, from design to manufacturing, to distribution and when in use. Our teams always strive to innovate and introduce even more sustainable manufacturing practices at our 42 acre site in Somerset, United Kingdom.

Carbon Neutral

From 2024 Numatic has reached carbon neutrality for Scope 1 and 2 emissions, marking a significant milestone in our commitment to sustainability.

We support the following **Sustainable Development Goals (SDGs)** of the United Nations:

3 GOOD HEALTH AND WELL-BEING

5 GENDER EQUALITY

6 CLEAN WATER AND SANITATION

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

10 REDUCED INEQUALITIES

11 SUSTAINABLE CITIES AND COMMUNITIES

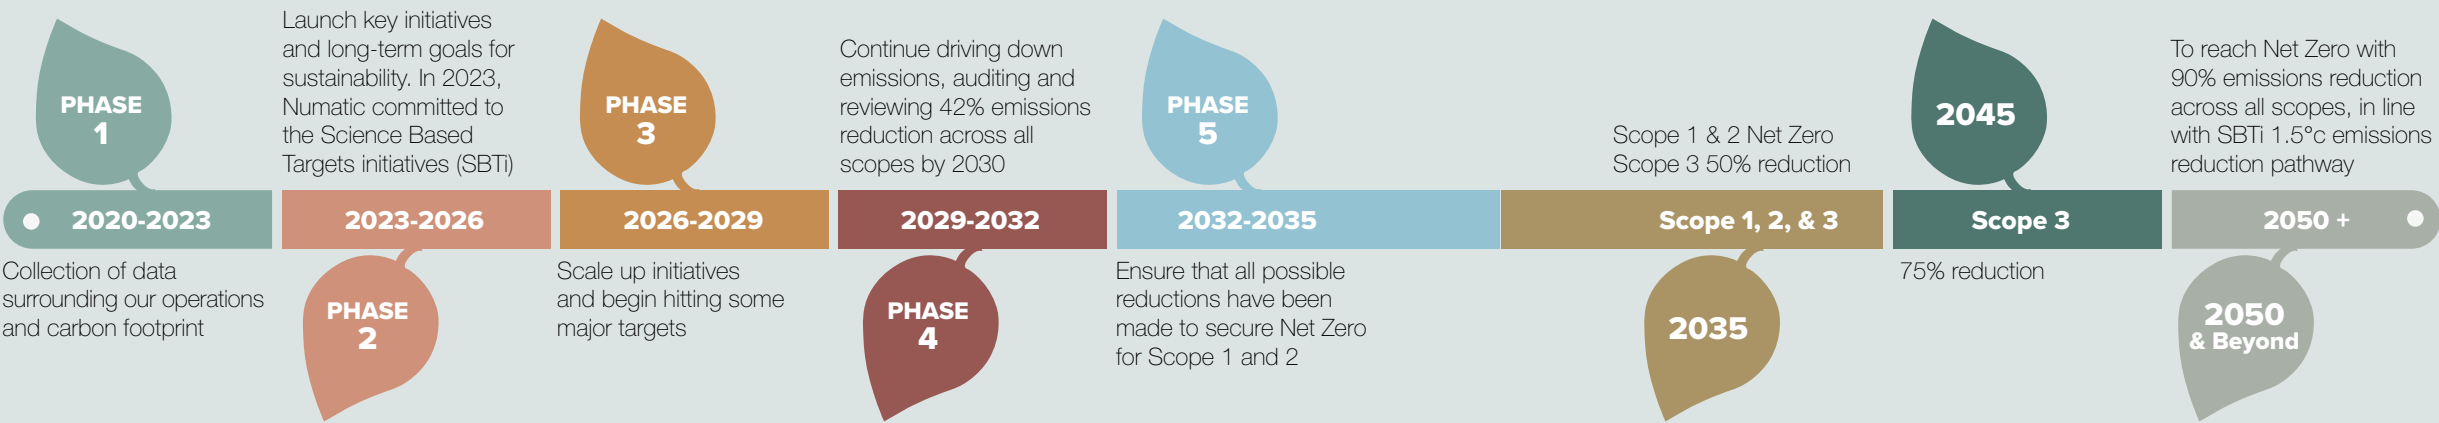

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

13 CLIMATE ACTION

Sustainability Roadmap

- Scope 1**

Direct emissions produced by our company facilities and our company vehicles.
- Scope 2**

Indirect emissions from purchased electricity, steam, heating and cooling used for our own use.
- Scope 3**

Emissions covered by Scope 3 include our upstream and downstream operations.

Sustainability in Action

Achieving ambitious sustainability targets requires innovation, action and transparency. These initiatives move us forward in reaching our goals and leading the way in providing sustainable cleaning solutions for our customers.

Sustainability is broader than just reducing our carbon footprint. True sustainability is helping others to be sustainable in their everyday practices, ensuring the earth and its communities are cared for.

Our ReFlo produced Janitorial Range of products carry the globally recognised SCS Recycled Content Certification. Working with an independent auditing body provides complete transparency and assurance to our customers. All our products certified by SCS Global Services guarantee a minimum amount of recycled material is used.

ReFlo Technology

Many of our products are made using ReFlo recycling plastic reducing the use of virgin plastic wherever possible, whilst maintaining the same quality and durability in our products. ReFlo Technology uses high-quality, post-industrial and post-consumer plastics across the Numatic range.

Following extensive research and testing, we have introduced ReFlo Technology to our FloorCare range, joining our VersaCare Janitorial and CleanCare Vacuum ranges.

“Made from the highest quality, recycled plastic.”

The Bigger Picture

We've partnered with **charity: water** to provide water to communities and projects that need it the most. Through every purchase of a NuClean Compact Scrubber Dryer, we donate the equivalent of 5000L of water. **Nepal, Piped system tap stand.**

Working in partnership with:

 **charity: water**

Our most recent completed project took place in Nepal, positively impacting a total of 596 people.

“Over **145 MILLION** Litres of water funded since launch in 2021.”

Every NuClean Compact Scrubber Dryer provides **5000L** of water to communities that need it.

Not Just Any Offsetting

We've been reducing our carbon footprint and offsetting global bag sales since 2020. We've partnered with a leading company in carbon offsetting innovation, C Level.

TARGETS AND INITIATIVES

We recognise the need and demand for sustainable cleaning solutions and commit to initiatives across our business.

This includes becoming Net Zero by 2035 (for Scope 1 and 2), setting incremental targets to keep us on track. Numatic has joined the Science Based Targets Initiative (SBTi), setting ambitious emissions reduction targets in line with the latest climate science.

While we work on reducing our emissions, we have taken additional measures to reduce our impact on the planet by carbon balancing our Scope 1 and 2 emissions through our trusted offsetting partner, C Level.

Smart Safe Charge System

Built-in battery status and health check safety system. The SoH (State of Health) system monitors multiple parameters ensuring battery safety.

Maximum Energy Deployment

Delivering power from cell to machine with minimum power loss via high-quality welded nickel power rails.

Integrated Heatsink Casing

Quickly and efficiently cools the pack in use, optimising delivery of power.

Integrated Handle

Quickly and easily hot-swap batteries across the Pro Cordless Network.

Integrated Cooling Design

Keeping cool allows maximum power delivery, the clever NX300 pack design eliminates air pockets acting as an insulation, transmitting heat directly out of the pack.

NX1K RANGE

Runs Longer

Configurable performance that suits you, offering increased runtime of up to 44%*. Ensuring you can keep cleaning when it is most convenient for you.

More Sustainable

NX1K lasts longer than lead alternatives, significantly reducing material use and disposal, providing a much more sustainable solution.

Fast & Flexible Charging

Unlike Lead, NX1K Fast Charge Technology allows completely flexible charging, allowing you to use your machine whenever you need to, no matter how much it's charged. NX1K Fast Charge Technology drives productivity, providing you an increase in machine availability in comparison to Lead.

Extended Long Life Power

Delivering over 4000 charge cycles, NX1K will last as long as your machine. Utilising the latest Lithium Phosphate Technology, NX1K is one of the safest battery platforms on the market. A 8-year battery warranty provides complete peace of mind for you and your cleaning fleet.†

Nu-Track Insights

Built-in with our intelligent fleet management telemetry system, Nu-Track provides in-depth insights, lowering costs and increasing productivity across your fleet.‡
